In 2022 both ISO/IEC 27001 and ISO/IEC 27002 were updated. The main changes are related to the order of the subjects and grouping them into domains. There are some additional subjects in both standards, in line with developments since the last versions, like threat intelligence, security in cloud services and data masking. All these changes are processed, where appropriate, in the exam literature 'Foundations of Information Security – Based on ISO 27001 and ISO 27002'. EXIN Information Security Foundation based on ISO/IEC 27001 has been updated accordingly.

Preparation Guide

- The scope and summary have been updated.
- All topics, exam requirements and exam specifications have been updated. The weights for all exam requirements have changed accordingly.
- The list of basic concepts has been updated. Some concepts have been removed. Some other concepts have been added.
