1. Overview

EXIN SIAM™ Professional (SIAMP.EN)

Scope

EXIN SIAM™ Professional certification confirms that the professional can perform activities in the four stages of the SIAM roadmap, managing multiple service providers and integrating them seamlessly to provide a single business-facing IT organization.

This certification includes the following topics:

- Discovery & Strategy
- Plan & Build
- Implement
- Run & Improve
- SIAM practices across the stages

Summary

To thrive in the digital era, organizations must focus on their customers and their experiences. The increasing reliance on technology requires effective management of supplier ecosystems. The Service Integration and Management (SIAM™) model addresses the complexities of managing multiple suppliers, integrating them seamlessly to provide a single business-facing IT-organization. As a result of this increased importance of SIAM, ISO/IEC published part 14 of ISO/IEC 20000: Guidance on the application of Service Integration and Management to ISO/IEC 20000-1. This is not exam literature.

The EXIN SIAM™ Professional certification tests a candidate's knowledge and skills of the activities in the four stages of the SIAM roadmap. The certification covers themes such as: the process of assigning the different roles and responsibilities, onboarding organizations into the SIAM ecosystem, and offboarding incumbent providers. It also includes the operation of a SIAM ecosystem and its continuous improvement. A candidate who successfully completes the EXIN SIAM™ Professional certification can analyze, plan, build and inspect a multi-service provider environment.

Context

The EXIN SIAM™ Professional certification is part of the EXIN SIAM™ qualification program.

Target group

This certification is aimed at professionals who have an interest in the practices of Service Integration and Management (SIAM) or want to apply or improve this methodology in an organization. The content of this certification is appropriate for employees of customer organizations who will commission SIAM models, employees who provide retained capabilities in a customer organization, service integrators, and service providers working within a SIAM ecosystem.

The target group includes, but is not limited to:

- organizational change managers
- business relationship managers
- contract managers
- service architects
- project managers
- service managers and practitioners
- SIAM consultants

Requirements for certification

- Successful completion of the EXIN SIAM™ Professional exam.
- Accredited EXIN SIAM™ Professional training, including completion of the Practical Assignments.

Examination details

Examination type:	Multiple-choice questions
Number of questions:	40
Pass mark:	65% (26/40 questions)
Open book:	No. The exam is based on a case study. This case study is provided as an appendix to the exam.
Notes:	No
Electronic equipment/aides permitted:	No
Exam duration:	90 minutes

The Rules and Regulations for EXIN's examinations apply to this exam.

Bloom level

The EXIN SIAM™ Professional certification tests candidates at Bloom level 3 and 4 according to Bloom's revised taxonomy:

- Bloom level 3: Application – shows that candidates have the ability to make use of information in a context different from the one in which it was learned. This type of questions aims to demonstrate that the candidate is able to solve problems in new situations by applying acquired knowledge, facts, techniques and rules in a different, or new way. These questions usually contain a short scenario.
- Bloom level 4: Analysis – shows that candidates have the ability to break learned information into its parts to understand it. This Bloom level is mainly tested in the Practical Assignments. The Practical Assignments aim to demonstrate that the candidate is able to examine and break information into parts by identifying motives or causes, make inferences and find evidence to support generalizations.

Training

Contact hours

The recommended number of contact hours for this training course is 21. This includes practical assignments, exam preparation and short breaks. This number of hours does not include lunch breaks, homework and the exam.

Indication study effort

112 hours (4 ECTS), depending on existing knowledge.

Training organization

You can find a list of our Accredited Training Organizations at www.exin.com.

2. Exam requirements

The exam requirements are specified in the exam specifications. The following table lists the topics of the module (exam requirements) and the subtopics (exam specifications).

Exam requirements	Exam specifications	Weight
1. Discovery & Strategy		32.5%
	1.1 Elements of a SIAM governance framework	7.5%
	1.2 Analysis of the current situation	10%
	1.3 Key elements of a SIAM strategy	15%
2. Plan & Build		30%
	2.1 Design a detailed SIAM model	20%
	2.2 Plan a SIAM implementation	10%
3. Implement		15%
	3.1 Different scenarios supporting a SIAM implementation	10%
	3.2 Ongoing organizational change management (OCM)	5%
4. Run & Improve		12.5%
	4.1 Operate, assure and improve a SIAM ecosystem	12.5%
5. SIAM practices across the stages		10%
	5.1 Application of SIAM practices	10%
Total		100%

Exam specifications

1. Discovery & Strategy

- 1.1 Elements of a SIAM governance framework
The candidate can...
 - 1.1.1 interpret the characteristics of governance in a SIAM ecosystem.
 - 1.1.2 differentiate SIAM governance roles.
 - 1.1.3 choose governance approaches for monitoring and measuring service performance.
- 1.2 Analysis of the current situation
The candidate can...
 - 1.2.1 analyze existing services, service groupings, service providers, and the marketplace.
 - 1.2.2 explain how to assess current capability.
 - 1.2.3 classify the influences for deciding on the SIAM model and sourcing approach.
- 1.3 Key elements of a SIAM strategy
The candidate can...
 - 1.3.1 interpret strategic drivers for SIAM.
 - 1.3.2 differentiate critical success factors for SIAM.
 - 1.3.3 interpret the principles and policies for roles and responsibilities.
 - 1.3.4 select an appropriate SIAM strategy.
 - 1.3.5 illustrate how to gain and maintain buy-in to a SIAM strategy.
 - 1.3.6 describe the content of the business case and the transition project for SIAM.

2. Plan & Build

- 2.1 Design a detailed SIAM model
The candidate can...
 - 2.1.1 analyze organization-specific service models and process models.
 - 2.1.2 select an appropriate sourcing approach and SIAM structure.
 - 2.1.3 describe detailed roles and responsibilities.
 - 2.1.4 select a performance measurement and reporting framework.
 - 2.1.5 select a collaboration model.
 - 2.1.6 analyze contract considerations for SIAM.
- 2.2 Plan a SIAM implementation
The candidate can...
 - 2.2.1 describe the challenges for organizational change.
 - 2.2.2 differentiate between approaches for onboarding of services and service providers.
 - 2.2.3 analyze the most appropriate tooling strategy and integration methods for a SIAM ecosystem.

3. Implement

- 3.1 Different scenarios supporting a SIAM implementation
The candidate can...
 - 3.1.1 choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
 - 3.1.2 explain how to transition to the approved SIAM model.
- 3.2 Ongoing organizational change management (OCM)
The candidate can...
 - 3.2.1 choose ways to influence morale and motivation.

4. Run & Improve

4.1 Operate, assure and improve a SIAM ecosystem

The candidate can...

- 4.1.1 analyze structural elements at different levels.
- 4.1.2 select appropriate mechanisms to address issues and improve provider and integrator performance.
- 4.1.3 apply audit and compliance mechanisms.

5. SIAM practices across the stages

5.1 Application of SIAM practices

The candidate can...

- 5.1.1 apply all SIAM practices of the Discovery & Strategy stage.
- 5.1.2 apply all SIAM practices of the Plan & Build stage.
- 5.1.3 apply all SIAM practices of the Implement stage.
- 5.1.4 apply all SIAM practices of the Run & Improve stage.

3. List of basic concepts

This chapter contains the terms and abbreviations with which candidates should be familiar.

Please note that knowledge of these terms alone does not suffice for the exam. The candidate must understand the concepts and be able to provide examples.

aggregation	greenfield
Agile	heat map
agile retrospective	hybrid service integrator
balanced scorecard	incumbent
benchmark	Infrastructure-as-a-Service (IaaS)
benefits realization management	insourcing
blue/red/amber/green reporting (BRAG)	intelligent client function
board	interdependency
business case	interim operating model
business-as-usual	interim service plan
capability	internal service provider
capability assessment	internally sourced service integrator
capital expenditure (CAPEX)	ISO/IEC 20000
cloud services	ITIL
COBIT	Kaizen
code of conduct	Kanban
collaboration agreement	key performance indicator (KPI)
commodity service	layers (SIAM layers)
common data dictionary	lead supplier service integrator
conflict of interest (CoI) plan	leading and lagging indicators
contract	Lean (systems) thinking
contract management	management methodology
cross-functional team	MoSCoW
current mode of operation (CMO)	multi-sourcing
customer (organization)	offboarding
Cynefin	onboarding
dashboard	operational expenditure (OPEX)
data room	operational level agreement (OLA)
disaggregation	organizational change management (OCM)
early life support (ELS)	open systems interconnect (OSI)
ecosystem	outcome
enterprise architecture	output
enterprise process framework (EPF)	outsourcing
entity relationship diagram (ERD)	performance management and reporting framework
escalation	Platform-as-a-Service (PaaS)
exit services schedule	practice
external service provider	prime vendor
externally sourced service integrator	process
framework	process forum
function	process manager
future mode of operation (FMO)	process model
governance	process owner
governance board	program management
governance framework	project management
governance model	

RACI (Responsible, Accountable, Consulting, Informed)	SFIA (Skills Framework for the Information Age)
request for information (RfI)	shadow IT
request for proposal (RfP)	SIAM ecosystem
responsibility	SIAM environment
results chain	SIAM governance lead role (SIAM) model
retained capabilities	SIAM operational lead role
risk management	SIAM structures
roadmap	skills map
Scrum	Software-as-a-Service (SaaS)
separation of duties	sourcing
service	stakeholder
service aggregation	stakeholder map
service assets	statement of requirements (SoR)
service boundaries	statement of works (SoW)
service consumer	strategy
service credits	structural element
service definition	supplier
service element	swim lanes
service grouping	theory of constraints (ToC)
service improvement plan (SIP)	tooling strategy
Service Integration and Management (SIAM)	tower
service integrator	town hall meeting
service line	transformation
service management	transition
service manager	trust-based approach
service model	visual management
service orchestration	war room approach
service outcomes	Waterfall
service owner	watermelon effect (watermelon reporting)
service provider	working group

4. Literature

Exam literature

The knowledge required for the exam is covered in the following literature:

- A. Simon Dorst, Michelle Major-Goldsmith, Claire Agutter et al.
Service Integration and Management (SIAM™) Professional Body of Knowledge
Freely available on <https://www.scopism.com/free-downloads/>.

	2.1.4	select a performance measurement and reporting framework.	A: Chapter 3.1
	2.1.5	select a collaboration model.	A: Chapter 3.1
	2.1.6	analyze contract considerations for SIAM.	A: Chapter 3.1
	2.2	Plan a SIAM implementation	
	2.2.1	describe the challenges for organizational change.	A: Chapter 3.2
	2.2.2	differentiate between approaches for onboarding of services and service providers.	A: Chapter 3.3
	2.2.3	analyze the most appropriate tooling strategy and integration methods for a SIAM ecosystem.	A: Chapter 3.1, 3.4

3. Implement			
	3.1	Different scenarios supporting a SIAM implementation	
	3.1.1	choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.	A: Chapter 4.1
	3.1.2	explain how to transition to the approved SIAM model.	A: Chapter 4.2
	3.2	Ongoing organizational change management (OCM)	
	3.2.1	choose ways to influence morale and motivation.	A: Chapter 4.3
4. Run & Improve			
	4.1	Operate, assure and improve a SIAM ecosystem	
	4.1.1	analyze structural elements at different levels.	A: Chapter 5.1, 5.2
	4.1.2	select appropriate mechanisms to address issues and improve provider and integrator performance.	A: Chapter 2.3, 5.3, 5.5
	4.1.3	apply audit and compliance mechanisms.	A: Chapter 5.4
5. SIAM practices across the stages			
	5.1	Application of SIAM practices	
	5.1.1	apply all SIAM practices of the Discovery & Strategy stage.	A: Chapter 2.8
	5.1.2	apply all SIAM practices of the Plan & Build stage.	A: Chapter 3.5
	5.1.3	apply all SIAM practices of the Implementation stage.	A: Chapter 4.4
	5.1.4	apply all SIAM practices of the Run & Improve stage.	A: Chapter 5.7

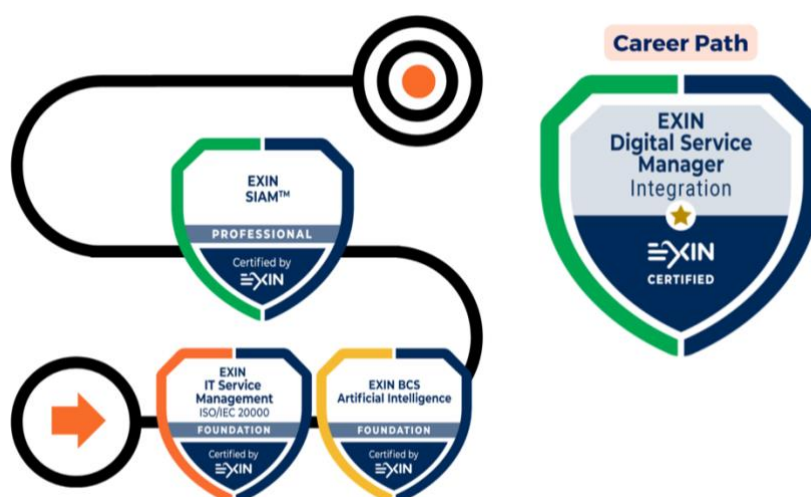

5. Career Path

At EXIN, we believe in the value of lifelong learning and the importance of combining diverse skills to thrive in today's dynamic and evolving world. With our EXIN Career Paths, candidates can prepare for specific job roles and continue to grow and advance in their professional journey. For more information on EXIN Career Paths, please refer to <https://www.exin.com/career-paths/>.

The EXIN SIAM™ Professional certification is part of the following EXIN Career Paths.

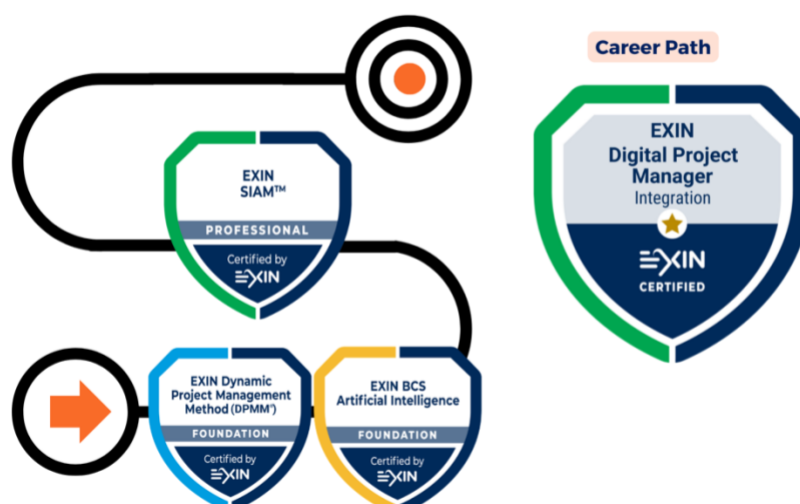

EXIN Digital Service Manager Integration

EXIN Digital Service Manager Integration enables professionals to lead digital transformation initiatives to leverage digital environments and artificial intelligence (AI) to reach organizational objectives.

EXIN Digital Project Management Integration

EXIN Digital Project Management Integration empowers professionals to effectively manage (agile) projects to stay ahead with digital innovation, while leveraging artificial intelligence (AI) and navigating a landscape of service integrations.

Driving Professional Growth
