

The EXIN Data Protection Certification provides the right knowledge and competences for those who are aiming to become or already are a Data Protection Officer, with the appropriate international recognition. When certified by EXIN as Data Protection Officer candidates have been extensively tested not only about the EU Regulation, but also the competences to take the role and perform the appropriate implementation and maintenance activities in an organization.

- THE IDEAL CERTIFICATION FOR ASPIRING (OR EXISTING) DATA PROTECTION OFFICERS!
- UNITES THE SUBJECTS OF INFORMATION SECURITY AND PRIVACY & DATA PROTECTION
- LEARN ABOUT GDPR IMPLEMENTATION, MAINTENANCE AND IMPROVEMENT
- FEATURES PRACTICAL ASSIGNMENTS TO VALIDATE THE REQUIRED COMPETENCES
- NO NEED TO PAY FOR RECERTIFICATION!

EXIN DATA PROTECTION OFFICER

Step 1

The Certified Data Protection Officer certification naturally begins with a Privacy & Data Protection certification. This creates a solid basis to build more specialized skills on with the second step in the certification path.

EXIN Privacy & Data Protection Foundation covers the main subjects related to the protection of personal data. Candidates benefit from a certification that is designed to impart all the required knowledge to help ensure compliance to the General Data Protection Regulation.

Step 2

Information Security is very important for aspiring DPOs. In light of this, the second domain in the Certified Data Protection certification has Information Security as a mandatory subject. In combination with the first certification, this gives candidates a broad understanding of security as a whole.

EXIN Information Security Foundation is a relevant certification for all professionals who work with confidential information. It explains the concept, value, and importance of information security as well as the threats and risks.

Step 3

The last certification is the specialist level Privacy & Data Protection certification that includes practical assignments so that candidates get to experience what is asked of a DPO and to test their skills before putting them into practice in real-life situations.

EXIN Privacy and Data Protection Practitioner is an advanced-level certification that validates a professional's knowledge and understanding of the European General Data Protection Regulation (GDPR). The exam tests the candidate's ability to apply this knowledge and understanding in everyday professional practice.
